

Sprint 2 Report

Coursierge

May 8th, 2018

Actions to Stop Doing:

Wasting time on during the meetings by discussing story points. We should work on them to our best ability until the end of the Sprint; then, we can discuss whether the idea is feasible to continue. This results in wasting time that could be spent refining other story points or developing the actual feature in question.

Actions to Start Doing:

Being more vocal about time commitments that restrain our ability to work on our project. If someone has a busy week, difficult assignment, or exam they need to focus on, then that group member should be vocal about it so his team can help him out.

We also need to focus our sprint development time to actually developing rather than debating over whether to keep the story point. If it begins to get out of hand, then the discussion can begin.

Actions to Keep Doing:

We've improved on our attendance and punctuality to meetings. This should continue as it allows the group to work together for longer and at a more productive rate.

Work Completed:

- As a user, I want a clean and creative UI to allow me to easily establish a connection to lectures.
- As a user, I want a reliable connection to watch or broadcast classroom content.

Work Not Completed:

- As a professor, I want to have a method to switch between casting a file or sharing a file over a connection to mobile devices or camera stream.
 - Haven't implemented a functional screen sharing system.

Work Completion Rate:

Total User Stories Completed: 2

Total Work Hours Estimated: 26

Total Days Worked: 13

User Stories/day: 0.15

Hours/day: 2
