

Sprint 1 Report

Coursierge

April 25th, 2018

Actions to Stop Doing: Try to stop showing up to meetings late. This results in having to spend extra time repeating what we have covered in the meeting with people who came late.

Actions to Start Doing: Start being punctual to meetings! The faster we can hold our Scrum meeting to get everyone caught up on what is happening, the faster we can get down to development. Also, start commenting code. It's hard to debug a large chunk of code written by someone else when there are no comments. We also need to communicate better on Messenger so that everyone has a clear idea of their role and the documentation required by the deadline.

Actions to Keep Doing: Keep supporting each other, this is really good. If one person has someone else really important to do on a certain day, everyone else should pick it up and cover for him by getting a little more done. Also, keep up the good work with pair programming, so far this has been very efficient in discovering and fixing new bugs.

Work completed:

- As a developer, I want to implement a streaming service so that I can establish a connection between the professor(s) and student(s).
- As a developer, I want to separate classrooms by their class/section.

Work not completed:

- Additional feature for separating classrooms by class/section: String parsing to detect typos and suggest certain classrooms or sections.

Work Completion Rate:

Total User Stories Completed: 2

Total Work Hours Estimated: 35

Total Days Worked: 13

User Stories/day: 0.15

Hours/day: 2.69
